

# Introduction to Programming with Java

Class: **SumArray.java**

Score: ★★ (Easy)

## Description:

Write a program that creates an array with random numbers and prints the sum of array elements. Size of the array **arraySize** is taken from the user. Note that your program should fill the all elements of array with random numbers in range [0-10].

## Sample Run:

```
This program generates random numbers and sum them.  
  
Enter how many random numbers to generate: 5  
  
Array Contents:  
[ 2 1 2 4 5 ]  
  
Array Sum: 14
```
