Introduction to Programming

with Java

Class: **ReverseLines.java**

Score: ⭐ ⭐ (Easy)

Description:

Since strings are sequence of characters, we can store strings in character arrays. To store multiple lines of string, 2 dimensional character arrays are commonly used. Implement a program that reverses lines of a given 2 dimensional char array

Sample Run:

```
This program reverses the lines.

The music is reversible but Time is not.

Congratulations. You have just discovered the secret message.

Messin' with things you don't understand

Reversed Version:

Messin' with things you don't understand

Congratulations. You have just discovered the secret message.

The music is reversible but Time is not.
```
